PRESTO 1000 XL RANGE

Mechanical direct
flush valves

Increased hygiene,
efficiency and cleanliness
in public places!

MECHANICAL DIRECT DUAL FLUSH VALVES SUITABLE FOR STANDARD TOILETS BOWLS AND RIMLESS TOILETS BOWLS

Comfort
Easy push-button operation

Control of water consumption
- Dual volume, independently ajustable
- Constant flow rate of 1 l/s, from 1.2 to 4 bar dynamic pressure
- S® System prevents blockage in continuous flow
- 4 liters economic version available

Vandal Resistant
- Concealed version reduces risk of damage
- Compact brushed stainless steel front-plate with no visible screws

Reliability
Designed and tested for intensive use

Easy maintenance and installation
- Direct access to components from the front
- Isolation of the network thanks to the integrated and accessible stop valve

Hygiene
Direct flush valve reduces water stagnation and bacteria growth

Safety
- Direct flush valve reduces the risk of leaks, very few mechanical parts are in contact with the water, reducing the risk of scaling and breaking them
- Anti-siphon device

CHARACTERISTICS

- Mechanical direct flush valve with independently ajustable dual volume
- Discharge volume per flush:
  - Small volume from 2.5 to 5 litres, adjustable by a ruler inside the front-plate
  - Large volume from 6 to 9 litres, adjustable with spanner adjuster on the tap
- Effective flow rate of 1 litre/second
- Connection ¾" BSP
- Available in rimless toilet bowl suitable version
