## APPLICATION

HEALTHCARE

## PRODUCTS

RADA V12 SHOWER

**As an award-winning provider of water safety products and hygiene solutions, Nant required market-leading water control technology to help it maintain the highest standards of water hygiene across the healthcare and social care sectors – making Rada Controls the ideal choice.**

With around 70% of its client base in the care industry, delivering outstanding levels of safety and hygiene is absolutely critical and makes the specification and installation of water delivery systems a crucial aspect of Nant's business strategy.

This led them to work closely with Rada and independent stockist and supplier Faucets – a relationship still as strong now as it was when it began in 2011. In fact, Nant utilises Rada's market-leading taps, showers and other water outlets on a myriad of projects that range from single site installations through to large-scale national healthcare contracts.

Nant's Head of Customer Relations, Matt Price, revealed Rada Controls' proven history of designing and manufacturing trusted and efficient water delivery systems was a key factor in the decision to choose them as Nant's partner.

He said: "Our choice of Rada was driven by its reputation for market-leading water control technology, especially in healthcare and care environments where safety, performance and compliance are non-negotiable. Faucets have been an invaluable partner in sourcing and supplying these products reliably and efficiently.

"Both Rada and Faucets have been exceptional partners. Rada's technical expertise ensures we have the right product for each application while Faucets consistently deliver on time and in full, even for urgent or specialist orders. Communication is proactive, and both teams are approachable and solution-focused."

## Rada – A Kohler Company

Kohler Mira Ltd, Cromwell Road Cheltenham, Gloucestershire GL52

Rada Controls products have been specified in numerous care home refurbishments, remedial works across its care group clients and new build healthcare facilities, with a large care home operator using the Rada V12 shower across all its properties.

For the client, it is a non-negotiable specification due to its proven safety, simple maintenance and ease of use for residents. Consequently, hundreds of Rada v12 showers have been installed for this client over the past two years.

Matt said: "The Rada V12 shower in particular is a flagship product in our portfolio, especially within our care sector work. It offers precise temperature control, intuitive operation for vulnerable users, and quick, straightforward maintenance – all of which are essential in the environments we work in.

"Rada products help us meet statutory compliance obligations and many also contribute to water and energy efficiency, supporting our clients' environmental sustainability targets."

Matt was also keen to look ahead at a promising future with both Rada Controls and Faucets as key partners of theirs. He said: "We have many TMV service projects upcoming for our care clients and where replacements are required, Rada products will be specified and supplied via Faucets.

**Rada is the leading manufacturer of taps and showers designed specifically for healthcare. It understands the challenges and demands healthcare professionals on the frontline face. For more information on Intelligent Care and how it can help you create safer washrooms, contact Rada on 0344 571 1777 or visit [www.radacontrols.com](http://www.radacontrols.com)**

"We see this partnership continuing to strengthen, with more collaboration at the specification stage to ensure we select the most efficient, compliant, and cost-effective solutions for our clients."
